VE7BC completed three days of operation (Oct 3, 4, and 5) at BY1PK, working exclusively 20 Meter SSB during the hours of 0100Z to 0400Z. He worked the Western U.S.A. and a lot of Canadian stations. Openings to the Eastern U.S.A. lasted about 15-30 minutes. No word of how many contacts were made; the operation, which had been rumored might last as much as six weeks, is apparently over. It is still highly unlikely that any of the resident Chinese operators at any of the stations will be using SSB, as their command of English is limited.

XU1SS appeared several times last week, working on 14.195. They have no split frequency capability, and pileups on their frequency were horrendous. This was not the time to let any non-hams listen to your radio station. Is there anybody else out there who finds it incredible that people are taking this so seriously when it doesn't even count for DXCC? XU1SS, operated by members of the Kampuchean People's National Liberation Front in a refugee zone on the Thailand border, has invited visiting amateurs to operate.

TWO MORE OPERATIONS announced for the upcoming CQ WW Phone Contest this month: The Cambridge University Wireless Society will air GJ6UW from Jersey, operators to be G3ZAY, G4BUO, G4FAM, F4DSE, G5DSD (WA3NGL), G3XVR, and G33YHU. QSL to RSGB bureau or PO BOX 146, Cambridge.

W8OK and crew will again activate Zone 2, with six stations signing W8BI/VE2. Members of both the Southwest Ohio DX Ass'n and the Dayton ARA are included. There will be CW operation before and after the weekend, concentrating on 160-30 Meters. QSL W8BI c/b adr.

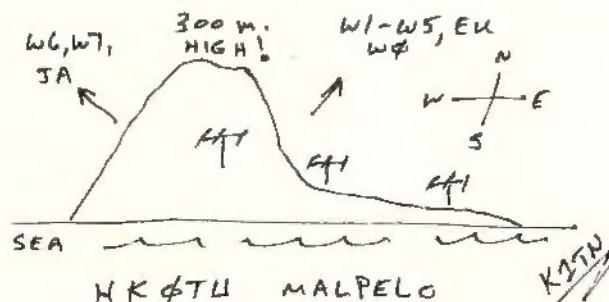

CYØSPI ST. PAUL STATISTICS

	11766	7997	390	20156

Above CYØSPI contacts made during the ten-day operation Sep 23-Oct 3. Color QSLs will be ready in a few weeks, vis VE1ASJ. Incidentally, over 1700 JA stations were worked.

MALPELO

JUST IN CASE you forgot it starts Oct 12 for five days. It is quite difficult to work from Asia and no piece of cake from W6/W7 either. The little diagram below, from JH1FDP's Japan DX News, tells the story:

NOTHING RARE in store this year for YASME's W6KG and W6QL. They will fire up from S. America any day now, with plans to operate from Colombia, Ecuador, Peru (4T4WTY), Bolivia, Chile, Argentina, Uruguay, and Paraguay. Emphasis to be on 160-30 Meters. QSL as always to YASME, PO BOX 2005, Castro Valley, CA 94546.

LATEST A6XJC report is 14084 RTTY, 1905Z, 10/3.

AUSTRALIANS using AX prefix if they like, to celebrate their America's Cup victory.

Copyright 1983 The DX Bulletin

The DX Bulletin (ISSN 0279-8077) is published weekly fifty times per year at the following rates: 48 contiguous states \$28 per year (\$35 per year optional first class mail); Canada, Mexico, Alaska, Hawaii, Puerto Rico, APO, and FPO boxes, \$35 per year; all others \$50 per year (airmail). The DX Bulletin is published at 306 Vernon Avenue, Vernon CT 06066. Second-class postage paid at Vernon, CT. POSTMASTER: Send address changes to The DX Bulletin, P.O. Box 873, Vernon, CT. 06066

Here's Karl Renz, K4YT, at BY1PK last spring. Karl declined a chance to operate that time, since he was at the station when propagation existed pretty much only for short-haul work. There's a possibility of operating by another U.S. amateur late next month.

K4YT is winding up his African trip the next few weeks; see details in the Calendar. S79WHW QSOs on Sep 3 were by K4YT, QSL to W2TK. Karl then made over a thousand contacts from Djibouti, signing J28ED from the home of J28AZ. Karl also reports J28AZ says nothing is happening, at the moment, regarding a possible 701 S. Yemen operation.

NUMBER OF NATIONS IS ANYBODY'S GUESS

by William Dunn

News Staff Writer, the Detroit News

THE NEW NATION of St. Kitts-Nevis, which gained its independence from England this week, brings the number of countries in the world to 168... or 215...or so.

It's not that nations have been lost in the counting, but rather that the so-called experts don't agree on what constitutes a country or nation state. Everyone, however, does agree that the Caribbean islands of St. Kitts and Nevis, with a total population of 43,000, form the world's youngest independent nation.

It is places like Pitcairn Island, with its hundred or so inhabitants, Greenland, the Falkland Islands and even more obscure spots like Svalbard and Kiribati that make counting countries a hazardous exercise that's bound to offend someone somewhere. Here's how various officials arrive at their counts:

U.S. STATE DEPARTMENT

The Status of the World's Nations report of the State Department lists 168 countries or "independent states." The concept of independence used in (the report) means statehood, not under foreign jurisdiction, notes Sandra Shaw, chief of the department's cartography division. While some might argue that Soviet-bloc countries such as Poland and Hungary are not independent, the State Department includes them in its list.

CENSUS BUREAU

The Census Bureau, which is a part of the same government as the U.S. State Department, counts 202 countries worldwide in its World Population: 1983 report. "It does vary from place to place what people consider countries," admits Peter Johnson, an international demographer at the census.

Employing a broad definition of country, the bureau includes obviously independent countries, plus territories, possessions and a few principalities. For example, its list of 202 countries includes the principality of Monaco, the Vatican, the British colonies of Gibraltar and Pitcairn Island, and the Danish associate state of Greenland. Not included are the disputed Falkland Islands, which are claimed by both England and Argentina.

UNITED NATIONS

There are 158 "member states" in the world organization and eleven "non-member" or observer states, according to a UN official. He says those represent virtually all sovereign countries recognized by the world community. Curiously, the Ukraine and Byelorussia (both parts of the Soviet Union) are counted separately from the USSR in the list of 158 member states.

But Taiwan, with 17 million citizens, is counted among neither members nor nonmembers. The UN official explains: "That's not a country. It's considered a province of the People's Republic of China."

POPULATION REFERENCE BUREAU

The Population Reference Bureau, a demographic research and educational institute in Washington, D.C., counts 215 countries in the world. "There are all these arguable definitions of what a country is," concedes Jean van der Tak, a demographer and editor at the bureau. The Institute's list is exhaustive and includes virtually all geopolitical entities, whether sovereign or not. It includes First World, Second World, and Third World countries, along with what might be classed as where-in-the-world nations.

In the latter category would be Anguilla in the Caribbean, the North Sea island of Svalbard, and the Oceania garden spots of Kiribati, Nauru and Norfolk Island. All are colonies or other dependencies of major nations. Not included on the list are the Spratley Islands. A newsletter of the Population Reference Bureau explains:

"This disputed real estate in the South China Sea turned out, however, to be uninhabited, and so did not meet the standard."

Also not included on anybody's list is the Conch Republic, which was jokingly founded a few years ago by some disgruntled Floridians. The residents of one of the Florida Keys proclaimed their independence from mainland Florida to protest the annual invasion of tourists.

How many countries, then, are there on the globe today? It might be simplest and safest to just say that there are a couple of hundred, give or take a few dozen. And leave it at that.
